

ANTI-SEIZE COMPOUND

THREAD LUBRICANT

PRODUCT DESCRIPTION

Anti-Seize Compound is an economical thread lubricant for moderate temperatures that prevents galling in high torque applications and eases disassembly of threaded fasteners. Anti-Seize Compound is completely transparent to SOS analysis for use inside engines, transmissions, etc. Where SOS will be used, Anti-Seize Compound should be used on all highly torqued undercarriage components.

PRODUCT BENEFITS

- Prevents galling in high torque applications
- Eases disassembly of threaded fasteners
- Lubricates and prevents seizing of bolts and pins
- Brush in lid for easy application

PRODUCT APPLICATION

Anti-Seize Compound should be applied to the threads of the fastener as well as to the underside of bolt head and washer to prevent galling.

The Anti-Seize Compound can has a brush-in-lid for easy application.

PRODUCT NUMBER

WXK2811000
